

Community Workshops

Nine Circles educational workshops provide an opportunity for general adult audiences or local community groups to talk about preventing STBBIs (sexually transmitted and blood-borne infections) with a trained health educator.

With experience working in the community, we offer 90-minute presentations that are:

- client-centered to increase openness and knowledge around STBBI prevention
- sex positive and harm reduction based
- community-friendly and interactive

We may also be able to tailor a workshop to meet the needs of your community.

We can accommodate groups of 5 to 50.

Everyday Sexual Health workshop

Discuss the potential risks associated with different kinds of sex.

Find out how to make sex safer.

Learn about safer drug use practices.

Get information about routine testing.

HIV 101 workshop

Get up to date national and local HIV trends.

Learn about HIV testing and treatment.

Discuss simple tips to protect yourself as well as your community.

Address HIV related stigma.

If your organization would like to arrange one of our workshops,

contact our Health Promotion Coordinator at 204-940-6000 or education@ninecircles.ca
